RING SIZE GUIDE

Measure a ring you already own

Take a ring that fits the finger you have in mind.
Place it flat on the circles below.
Start from the smallest and work upwards: the right size is the circle whose outline stays just visible inside the band.

If your ring falls between two sizes, choose the larger one.

CHECK THE SCALE BEFORE MEASURING

5 cm / 1.97 inches

Before printing, set Page Scaling to "None" in the print dialog.
Place a ruler on the line above: it must measure exactly 5 cm.
If it does not, the circles will be the wrong size.

European size equals the inner circumference of the ring in millimetres.
American and British sizes are approximate: they follow a different scale,
and some fall between two values. When in doubt, choose the larger size.
